Introduction

We're young and new face for you, however, we are creative professional problem-solvers, ready to tackle your project with innovation and inspiration. We don't simply work on projects.

We create success through constant efforts that goes beyond mere competence to strive for excellence. We don't just address issues. We anticipate and resolve complications.

No matter what challenges you face, we take the time to get to know you, help define your needs and create an innovative solution. We're the professionals, planners and project management to rely on when you need deep experience and an expert partner. We have designed our Ingenuity tool to inform your choices and show the range of integrated specialisms that could be required to achieve your project vision.

We don't say we are the best but believe not less than the best and it gives such confidence to start with the conversation. When we connect our engineering professionals around a core idea, magic happens.

With a remarkable team experience and expertise Sky hub have long list good working relationship, repeat clients and successful projects, we continually work to improve our operations and deliver excellence.

We encourage you to give us a call. It's always good to talk for a bit and discuss your potential project, and then we could begin the journey together to make your vision viable.

Values

- Trust
- Ethics
- Time Delivery
- Integrity
- Innovation

Purpose

To create meaningful & prosperous lifestyle within our employees & customers.

Vision

To create a sustainable environment for the nation through professionalism & integrity.

Looking beyond constraints

Above and beyond the high-level constraints, our most projects additionally have different imperatives that we figure we should oversee in planning stage.

One should have extra eye to see the invisible of any project. Timing requirements for intermediate documents, prototypes, and other mid project deliverables is a mandatory apart from fixed-date milestones within the project plan.

The Reason For Existence

- To be with you and help to achieve your goal with our vision.
- To share & implement our experience into your projects for holistic professional solutions.
- To save cost on the project with value professionalism.
- To provide you best technical support.
- To grow with our knowledge & your success.

Our Expertise

YOUR PROJECT IN GOOD HANDS

Sky hub team manufactures adaptable modular partition products, delivers a variety of partition services, and develops tailor-made modular system solutions.

We have continuously developed this portfolio from beginning - and every single day we succeed in applying these capabilities in a project-oriented manner, thereby finding even better solutions for our customers.

We rely on the know-how of all colleagues involved along the value chain: in research and development, at production lines, in special teams, in our competence centres for installation and logistics, in our general planning offices, on all project worldwide. This is how we make **"experience the revolution..."** possible.

FERN

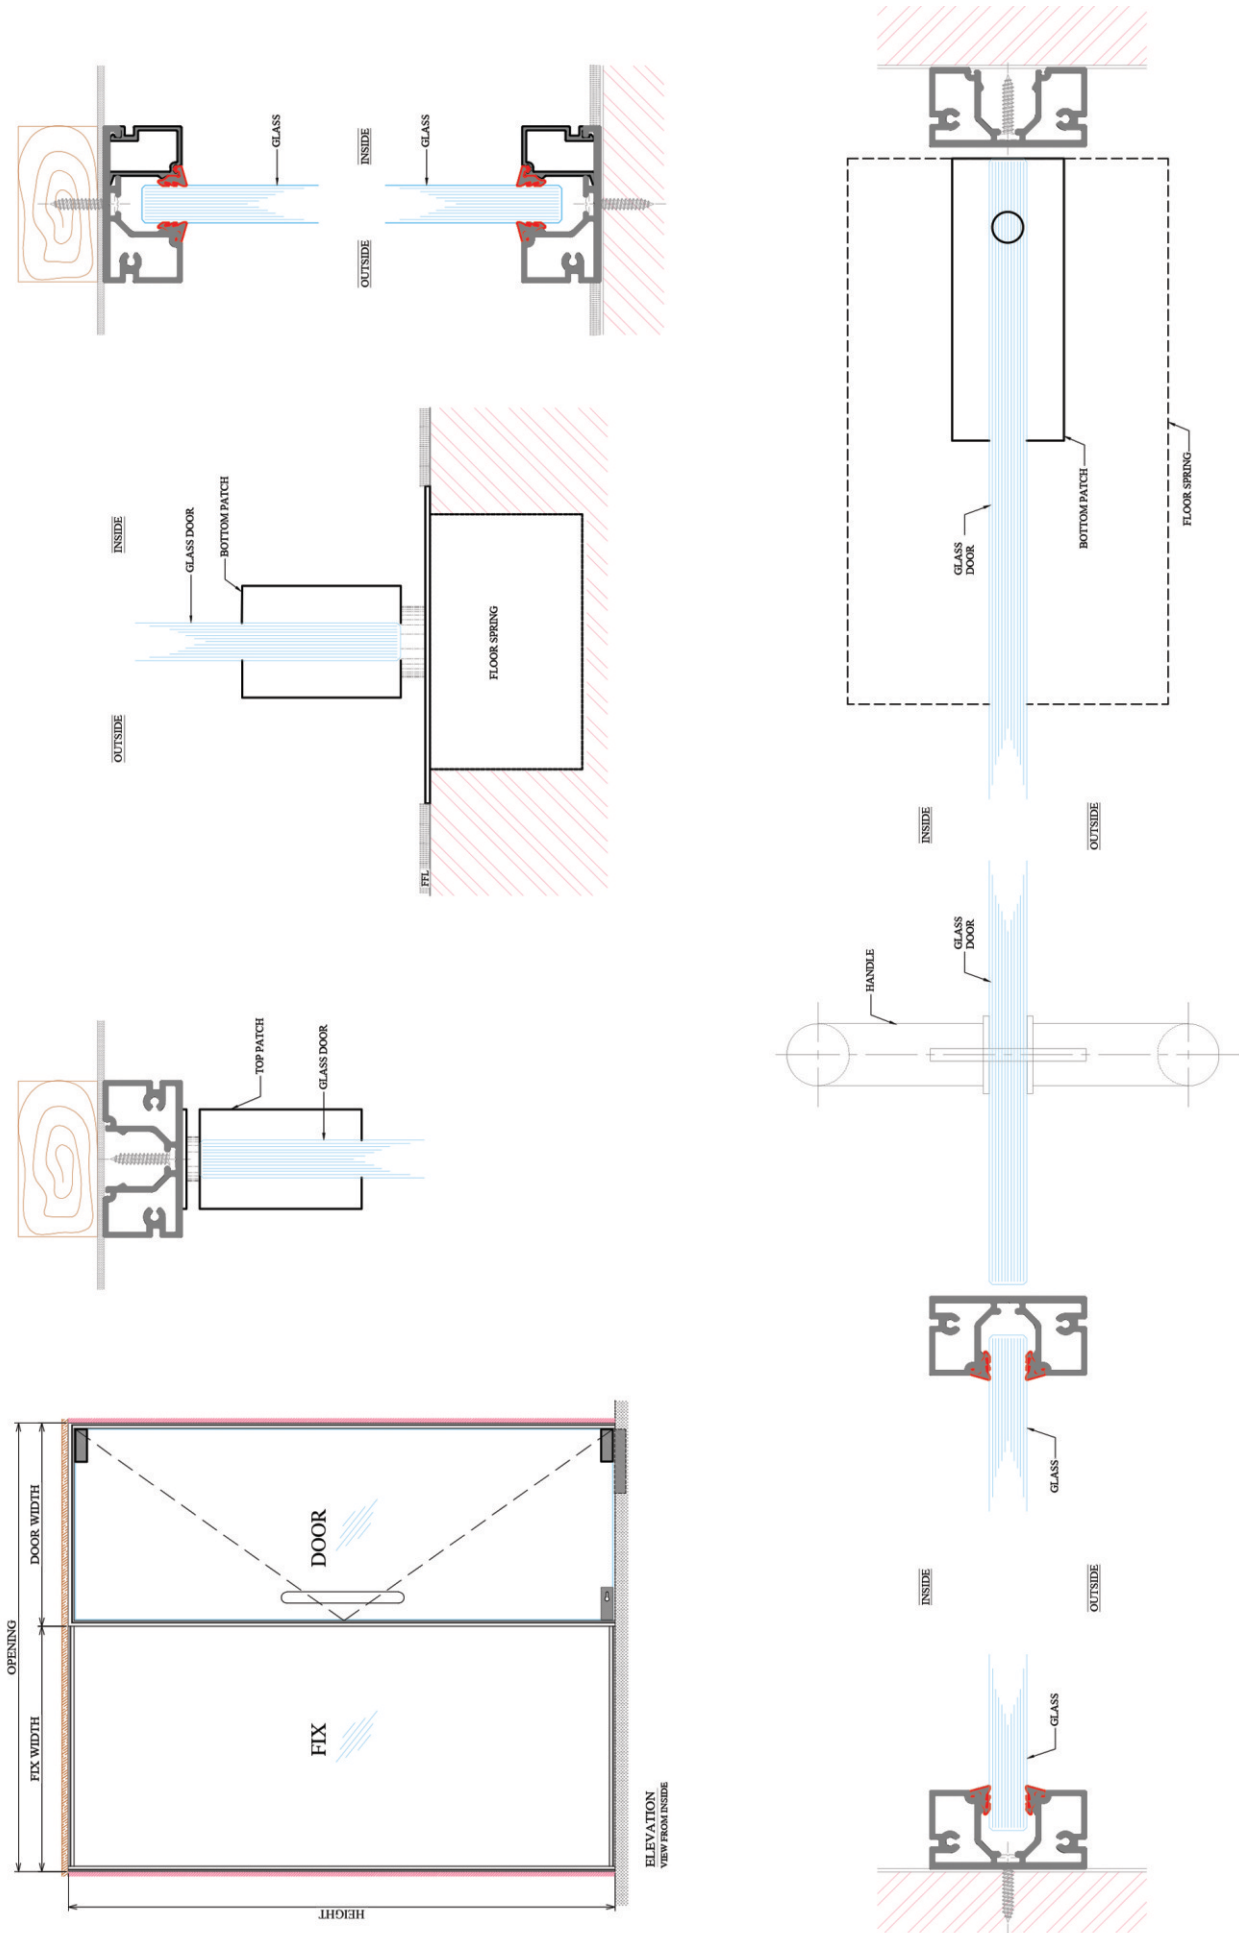

The contours & contrasting elements have been measured to the finest detail, resulting in a system that will give any office environment a stylish and modern edge. It's a single glazed partitioning system for normal office use where standard performance is the prerequisite.

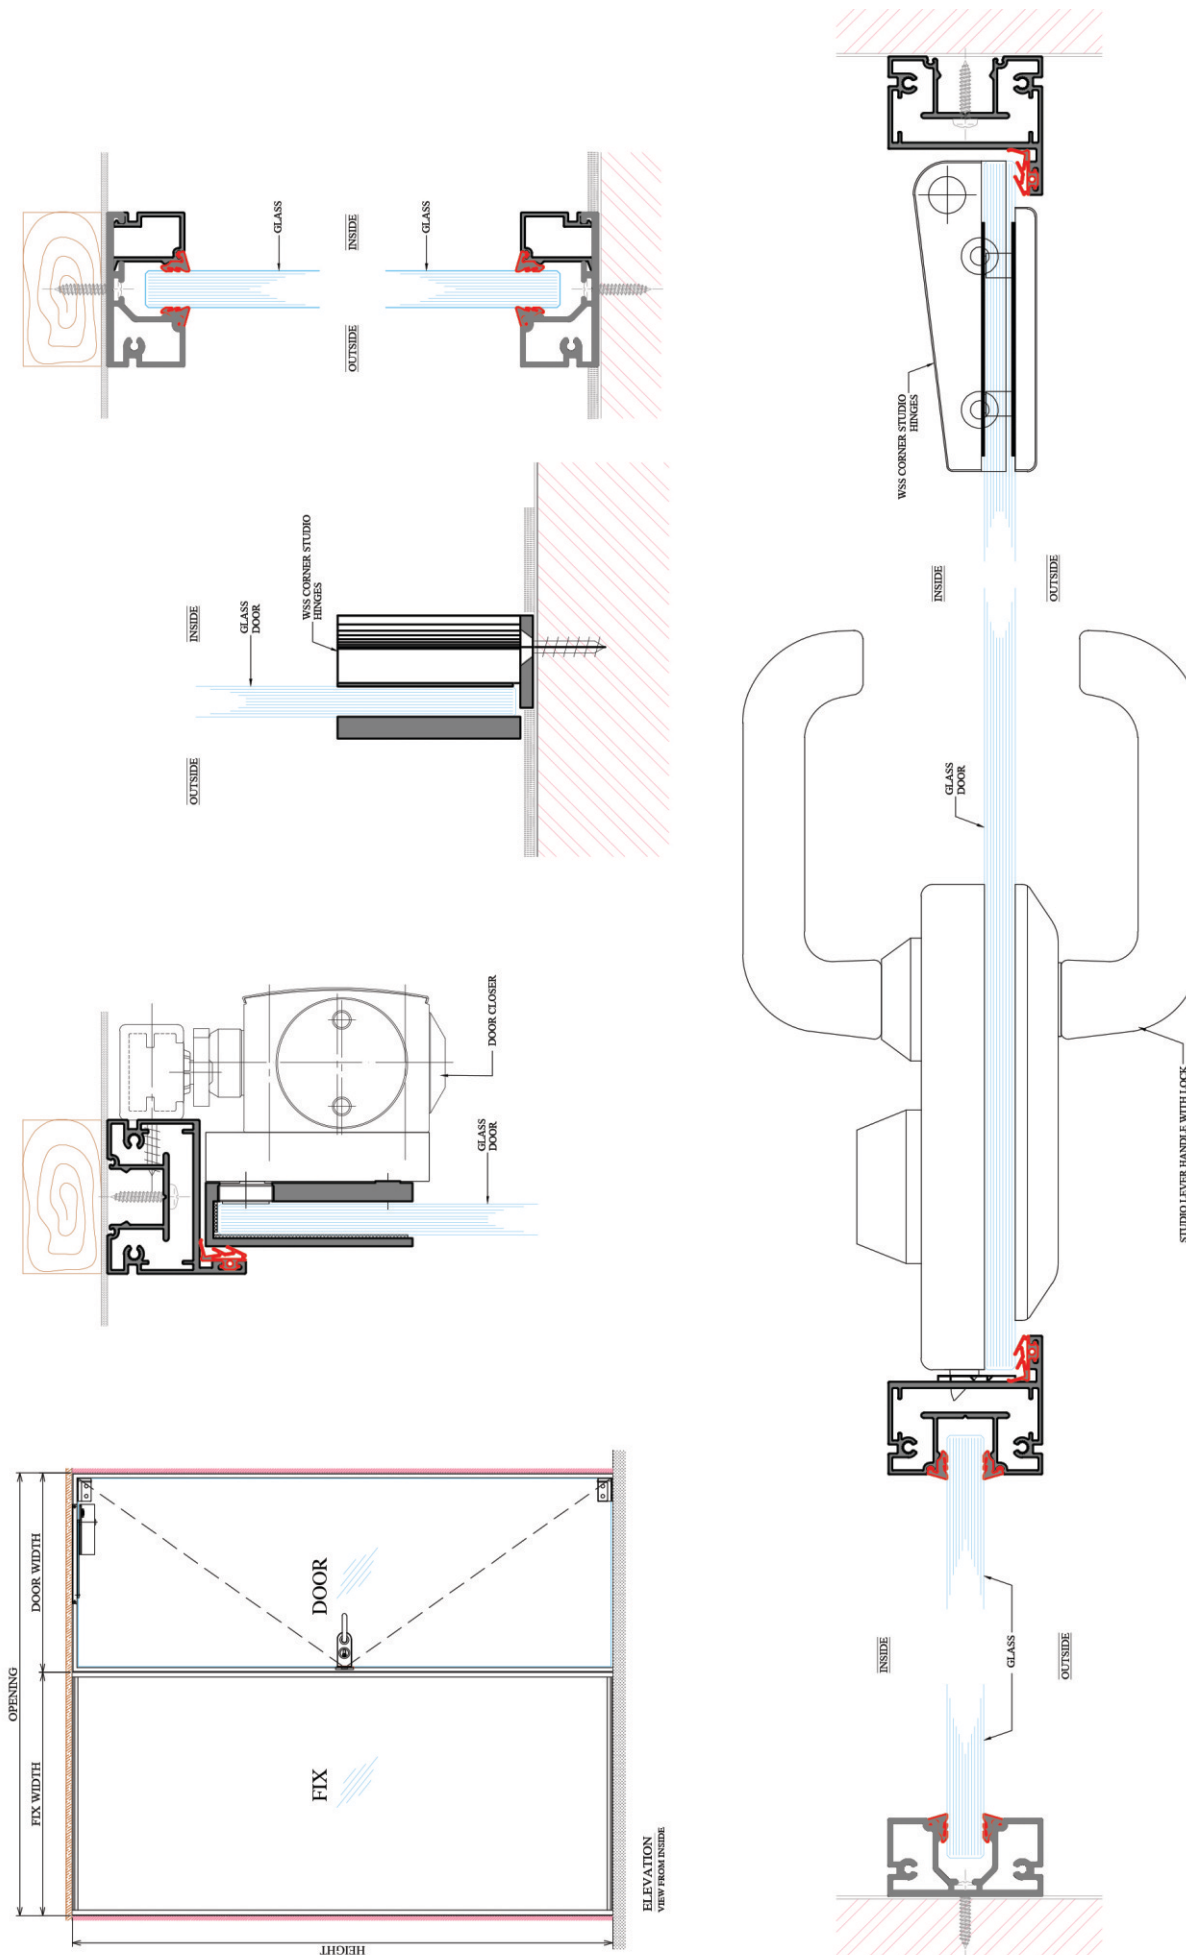

Sleek, symmetrical head & base tracks, complemented by a beautifully beveled door frame integrates seamlessly with adjacent glass panels. FERN answers all the design & technical criteria required of an office compartment.

TECHNICAL DETAILS	
Alloy	6063 - T6 Aluminium
Finish details with microns	Anodised / Powder Coated / SS Finish
Gauge	2MM (approx.)
Standard Size	50MM X 25MM
Available Length	5500MM / 2750MM
Acoustical Insulation	Achieves up to 29db - 32db
Partition System	Single glazed
Glass Specification	Safety glass, Standard 08MM, 10MM & 12MM depending on requirement
Areas of application	Office and conference rooms Industrial and factory areas Training and research areas
Height	Standard up to 3500MM (undivided 3000MM)
Modular Width	Standard up to 1250MM
Build Connections	Connection Accessories: A concealed hook-on system for the installation of FERN series. Industrial quality screws / fasteners in the vertical / horizontal profiles
Tolerances	Joint seals Seals are installed on floor, ceiling and support profiles.
	Connections Relocated floor, ceiling and wall connections. ±8MM in height and width

FERN

ASTER

Aster offers acoustic solutions with high functionality, design and acoustic properties that contribute to healthy indoor environments.

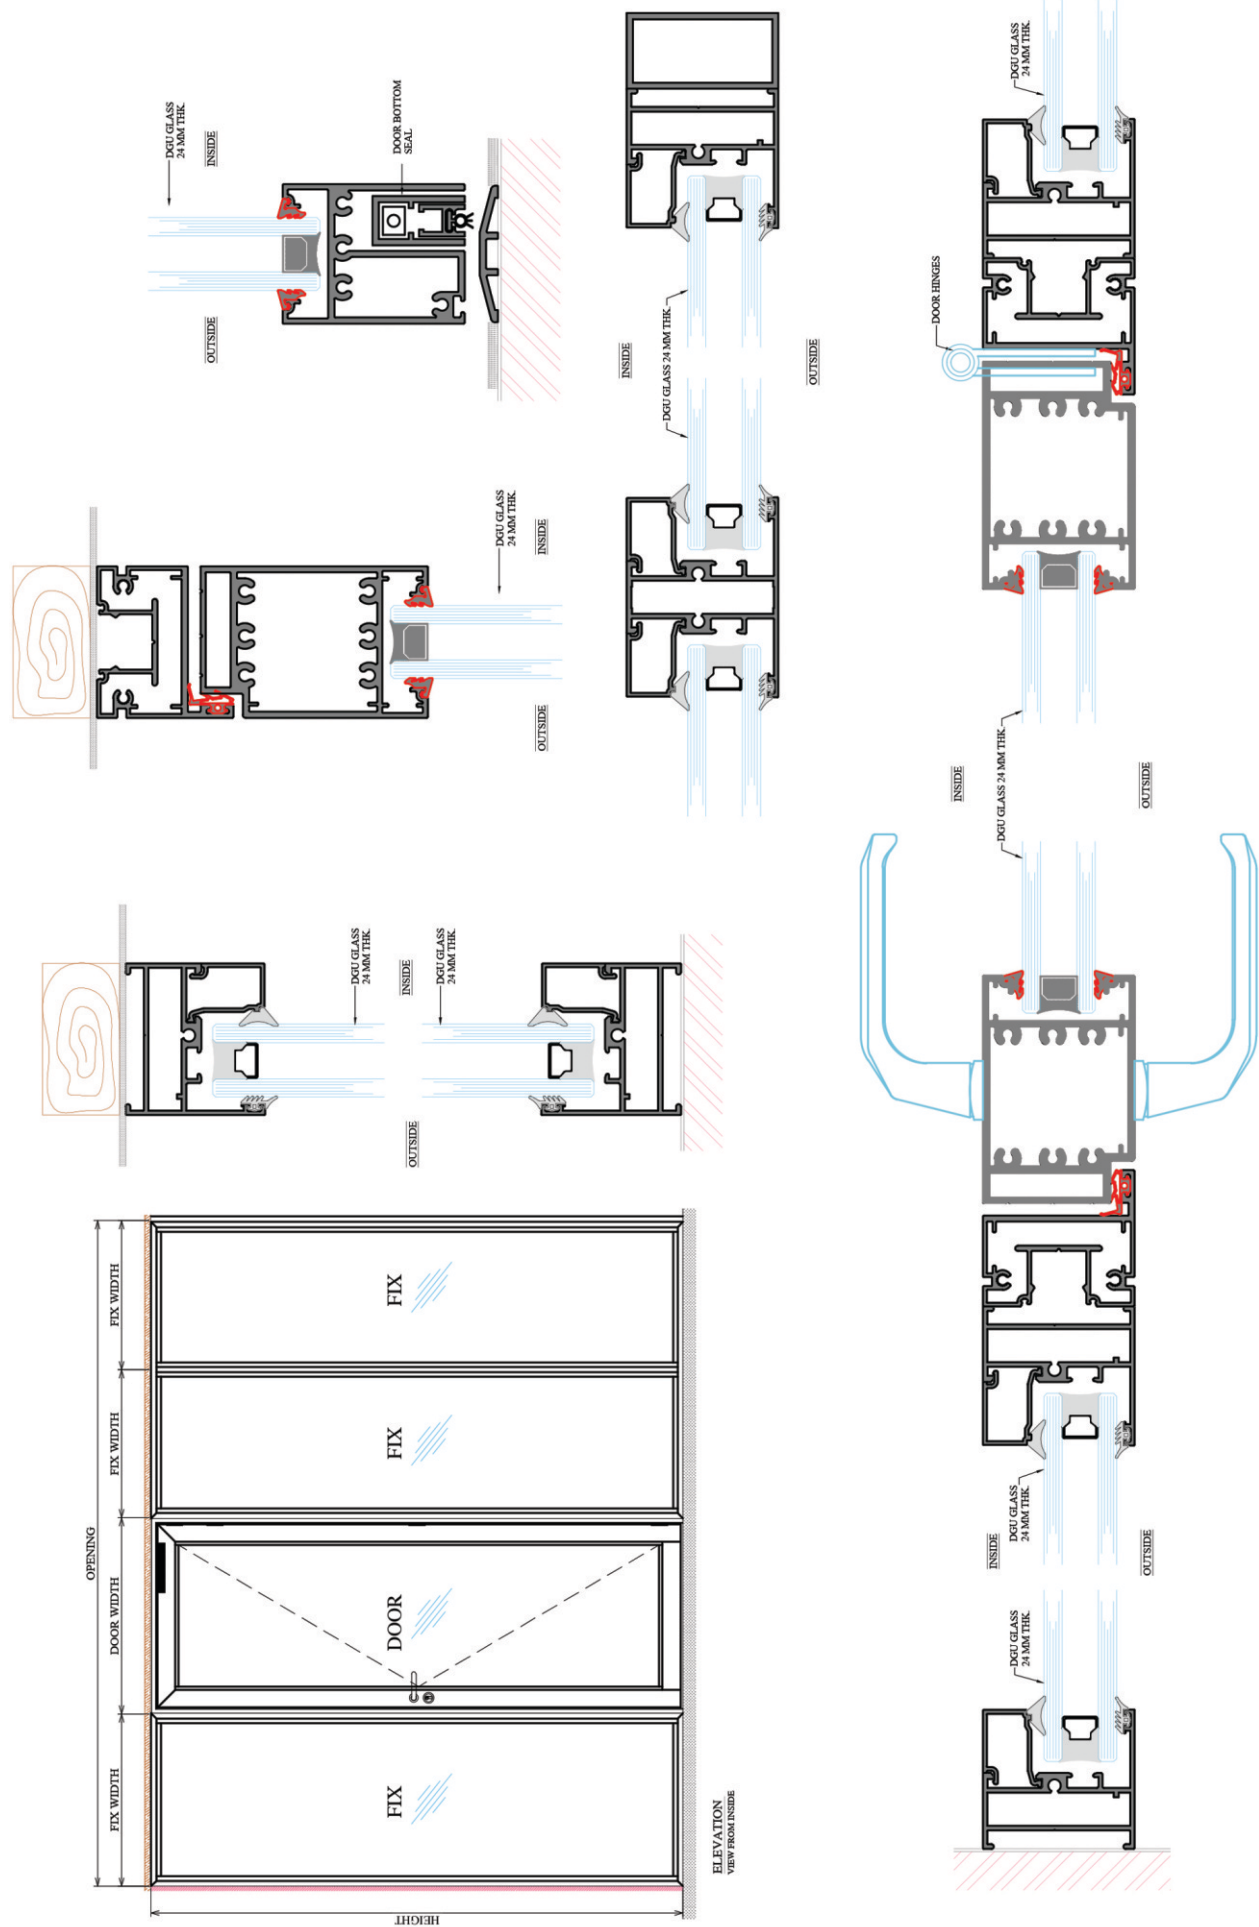

Aster give you true freedom to express yourself and to help you create the best possible room acoustics for most types of indoor environments.

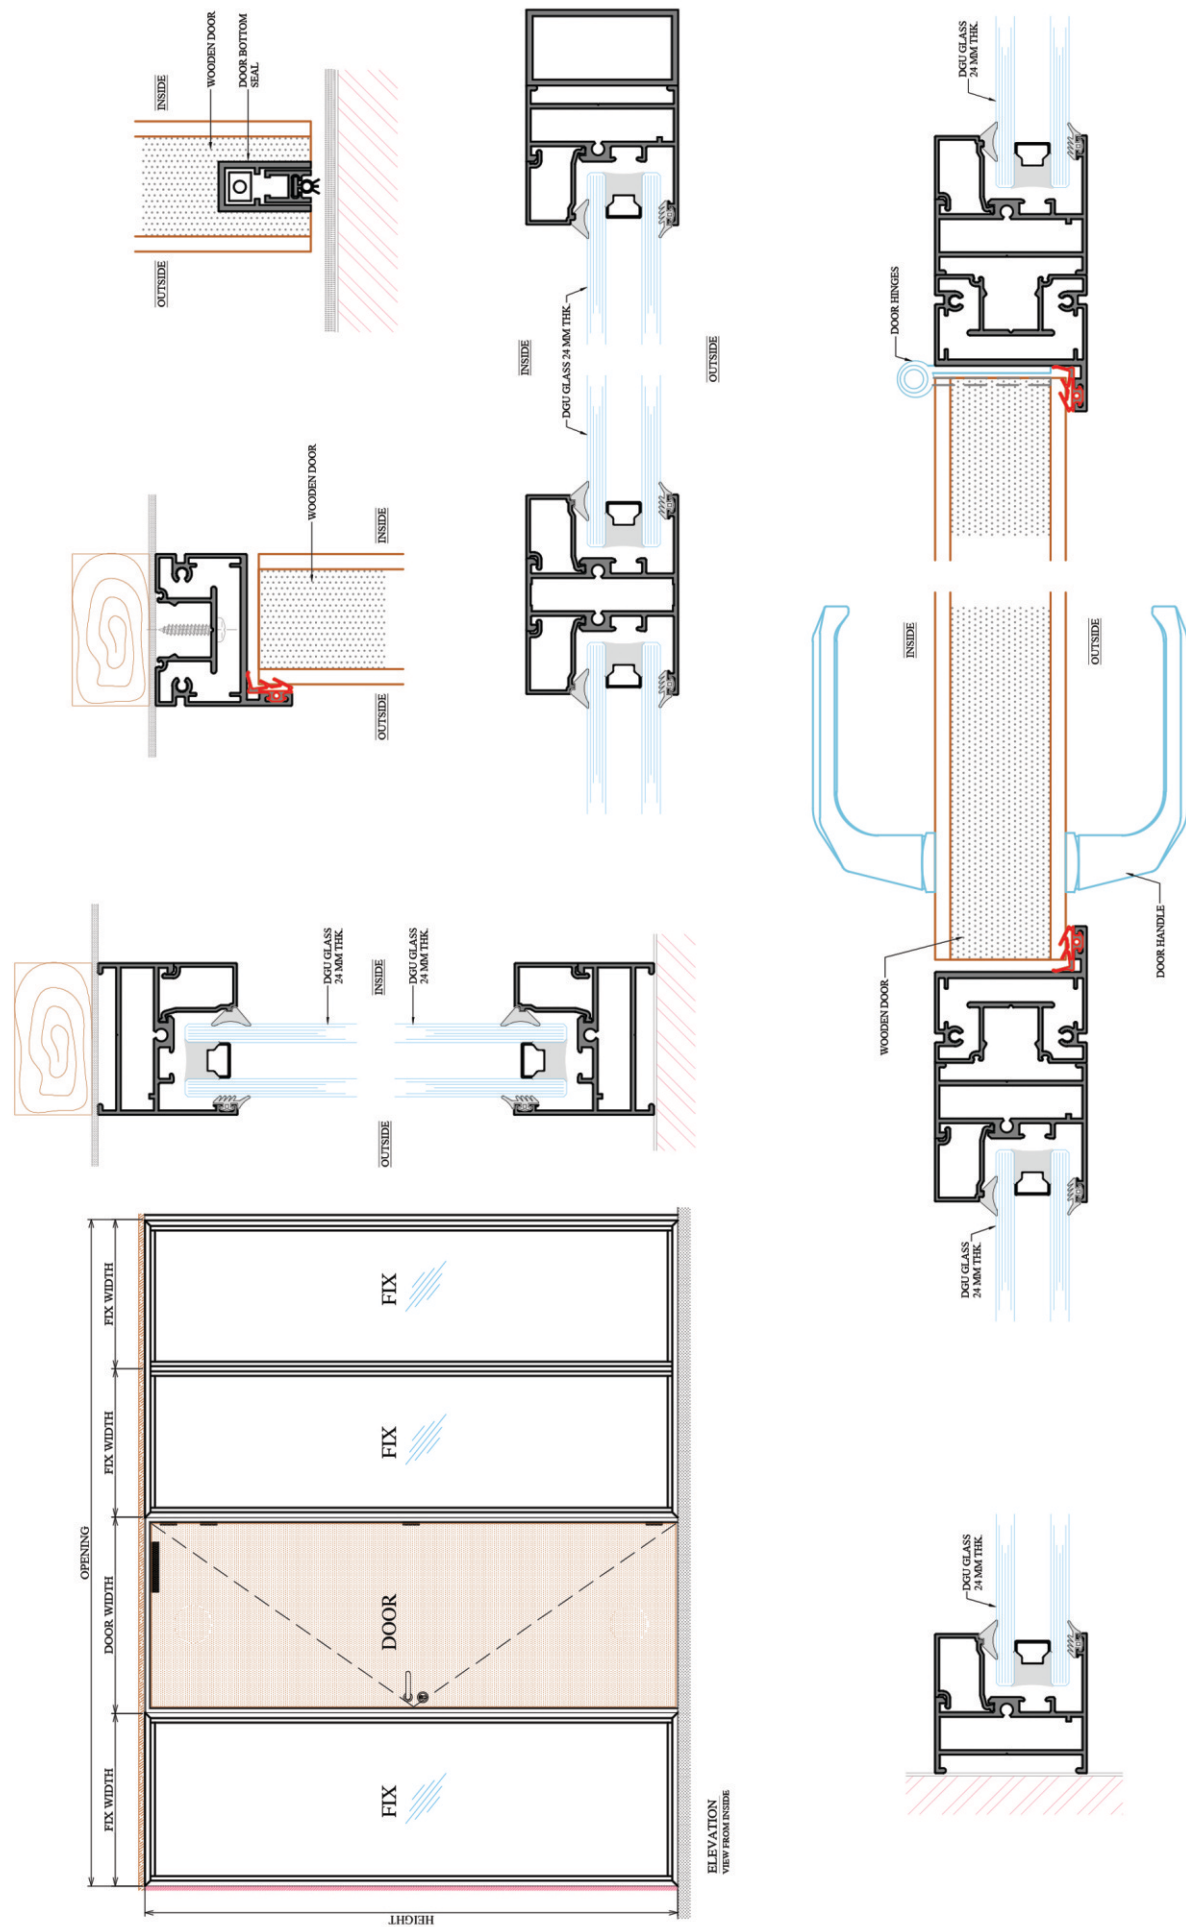

TECHNICAL DETAILS

Alloy	6063 - T6 Aluminium
Finish details with microns	Anodised / Powder Coated / SS Finish
Gauge	2MM (approx.)
Standard Size	50MM X 45MM
Available Length	5500MM / 2750MM
Acoustical Insulation	Achieves up to 34db - 38db
Partition System	Single glazed
Glass Specification	Safety glass, Standard 08MM, 10MM & 12MM depending on requirement
Areas of application	Office and conference rooms Industrial and factory areas Training and research areas
Height	Standard up to 3500MM (undivided 3000MM)
Modular Width	Standard up to 1250MM
Build Connections	Connection Accessories: A concealed hook-on system for the installation of ASTER series. Industrial quality screws / fasteners in the vertical / horizontal profiles
	Joint seals Seals are installed on floor, ceiling and support profiles.
	Connections Relocated floor, ceiling and wall connections.
Tolerances	±8MM in height and width

MAPLE

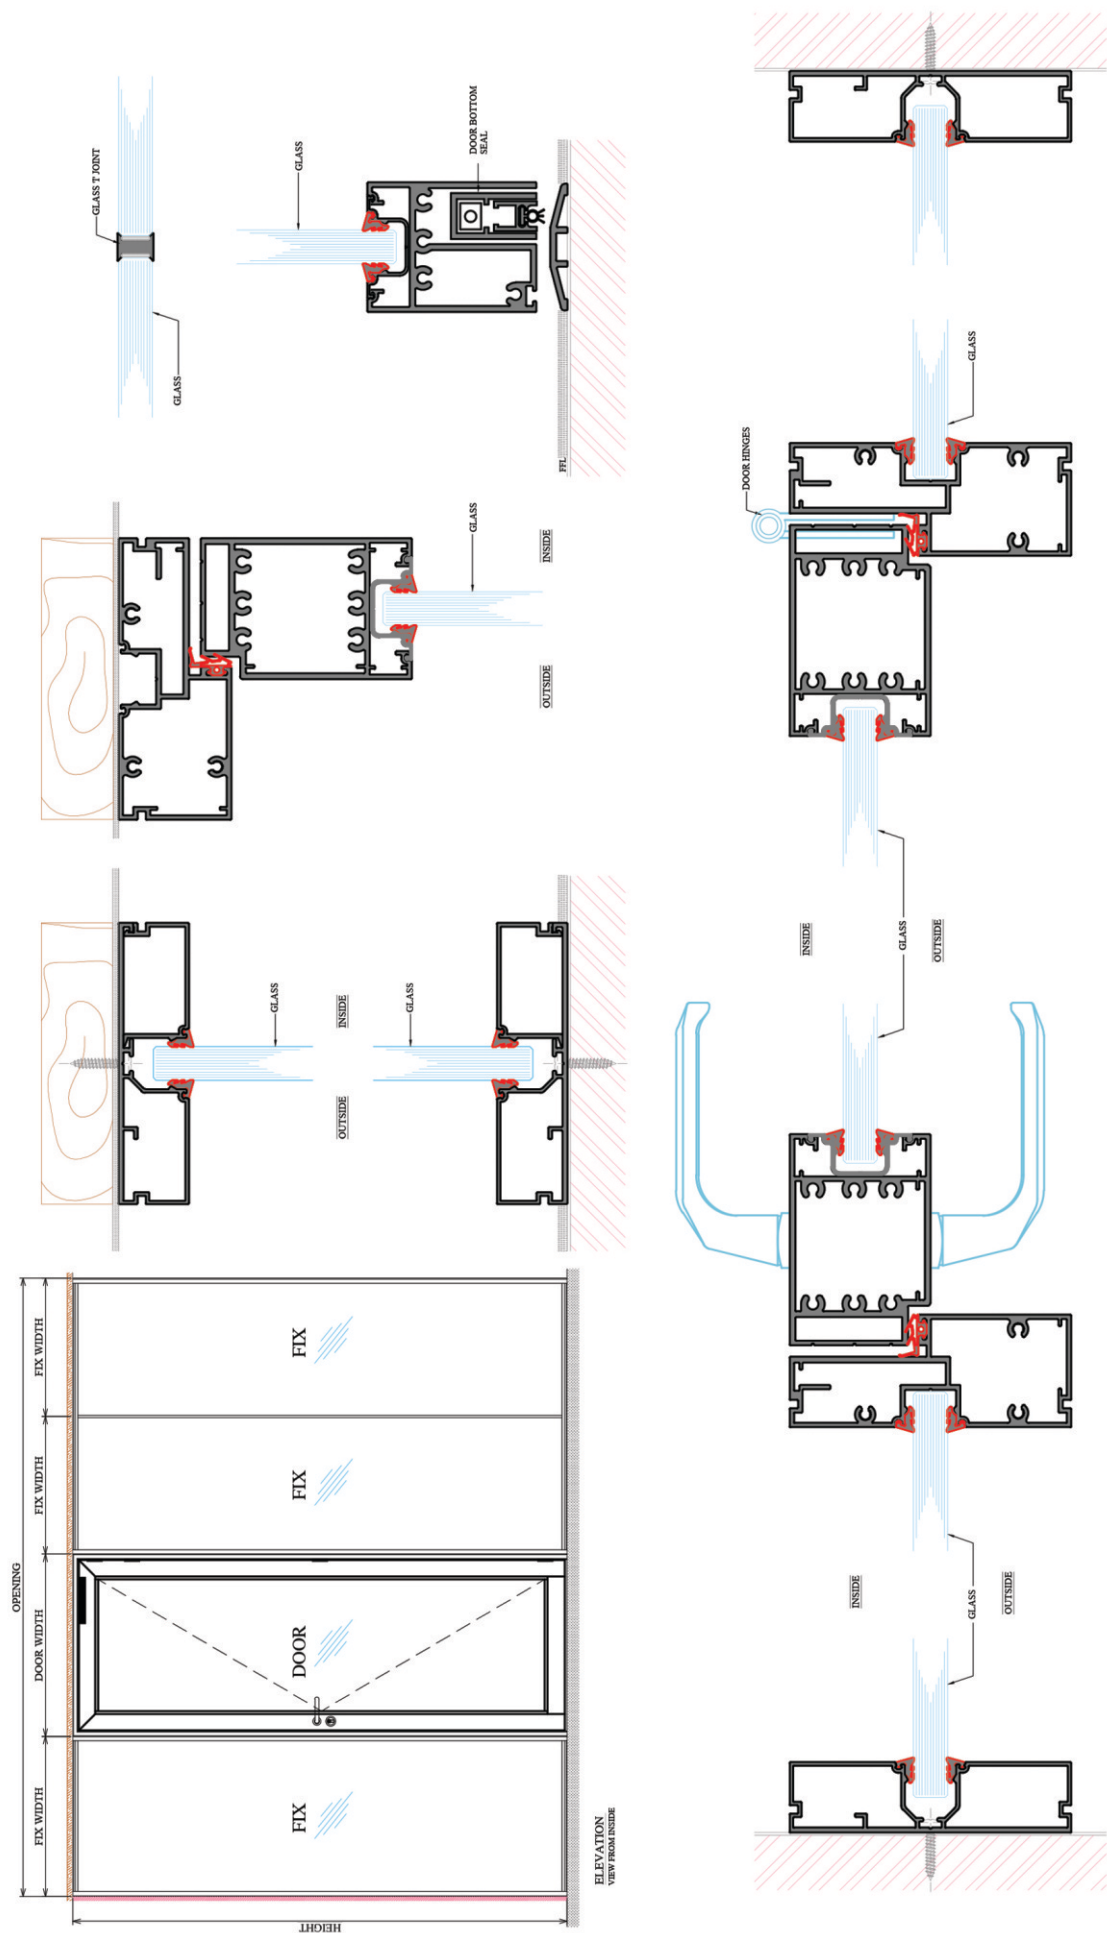

MAPLE integrates art & function to create spaces that accommodate individual preferences. With its elegance, refined details and enough acoustic performance, MAPLE is ahead of its time and will remain a classic for years to come.

It's a modular adjustable system combining glass & solid parts.

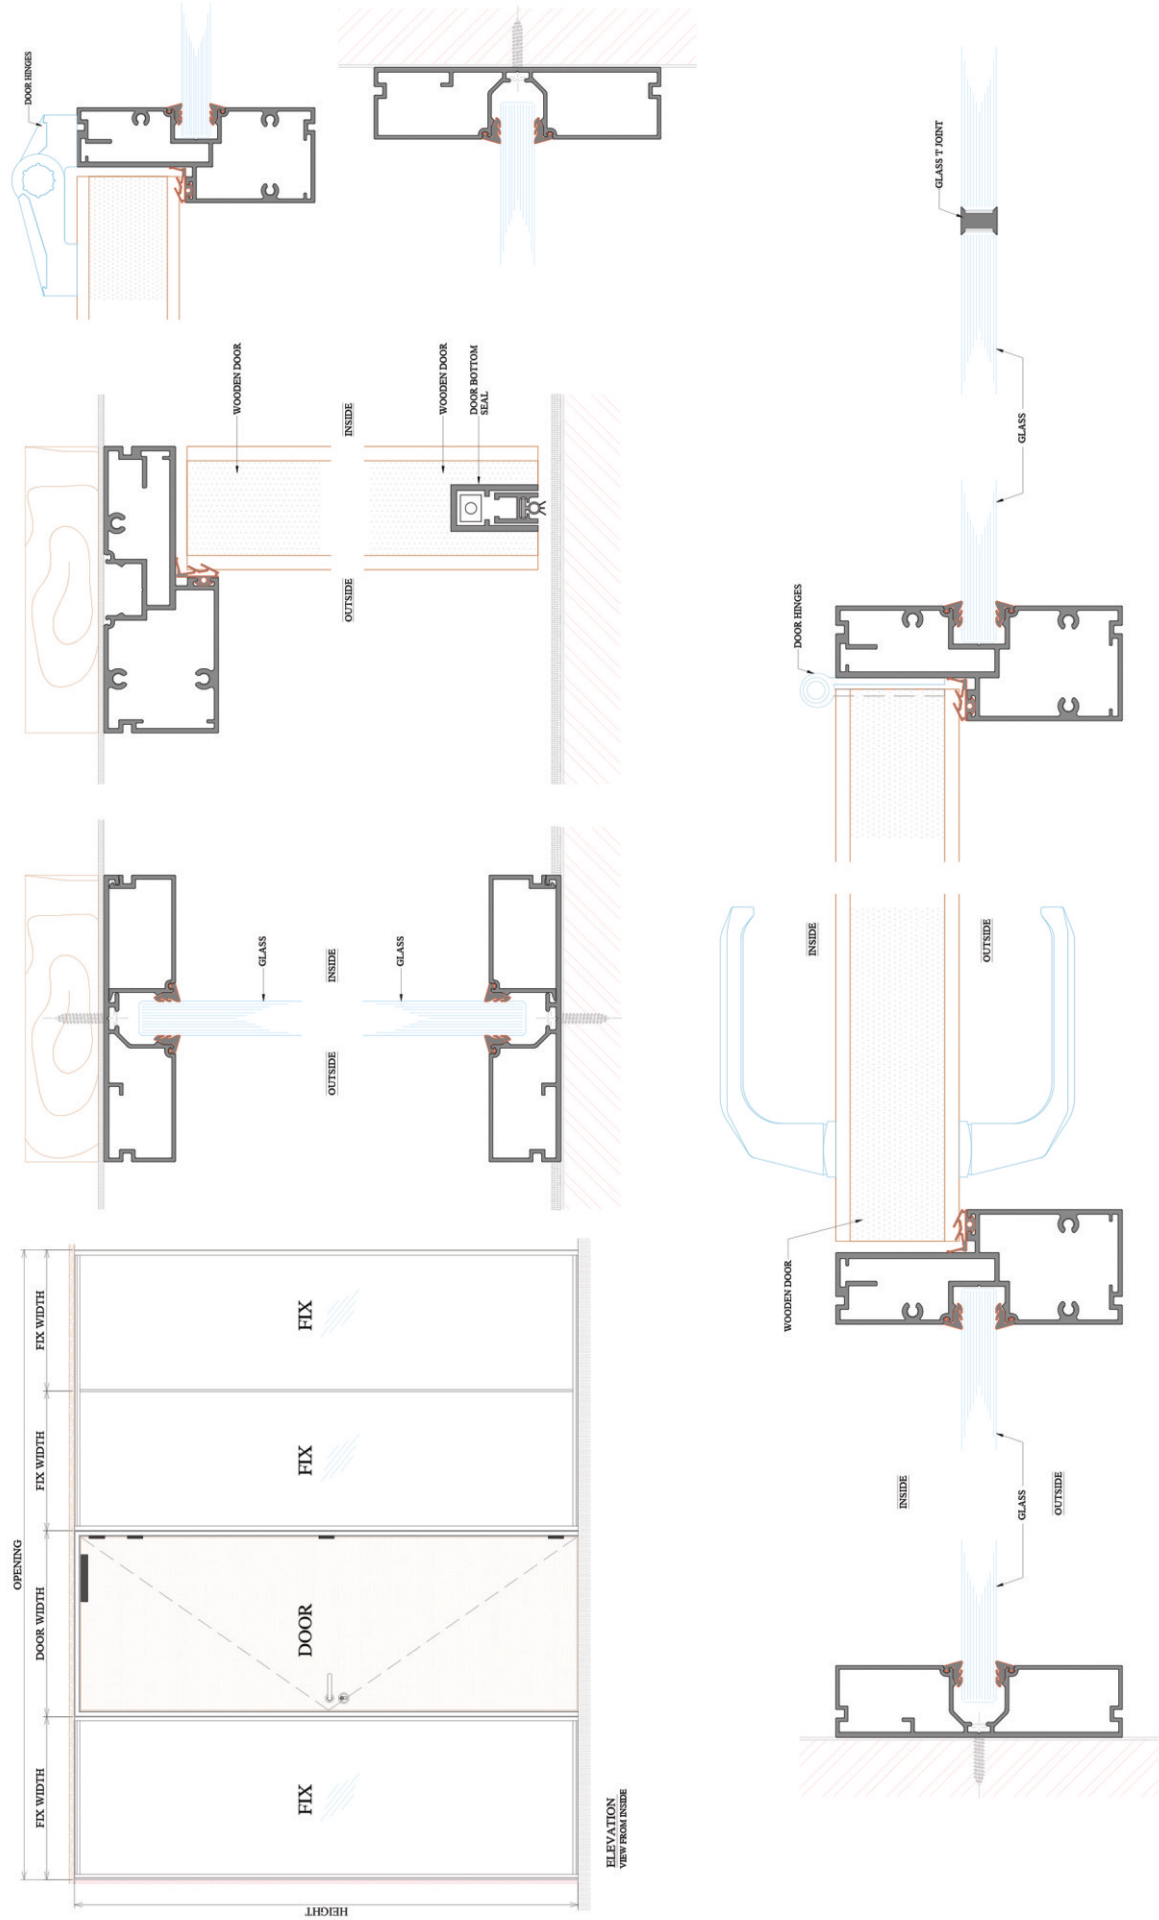

TECHNICAL DETAILS	
Alloy	6063 - T6 Aluminium
Finish details with microns	Anodised / Powder Coated / SS Finish
Gauge	2MM (approx.)
Standard Size	100MM X 25MM
Available Length	5500MM / 2750MM
Acoustical Insulation	Achieves up to 30db - 33db
Partition System	Single glazed
Glass Specification	Safety glass, Standard 08MM, 10MM & 12MM depending on requirement
Areas of application	Office and conference rooms Industrial and factory areas Training and research areas
Height	Standard up to 3500MM (undivided 3000MM)
Modular Width	Standard up to 1250MM
Build Connections	Connection Accessories: A concealed hook-on system for the installation of MAPLE series. Industrial quality screws / fasteners in the vertical / horizontal profiles
Tolerances	Joint seals Seals are installed on floor, ceiling and support profiles.
	Connections Relocated floor, ceiling and wall connections. ±8MM in height and width

Clan Series

Clan system is a glazed, narrow-frame acoustic door. Designed to offer maximum acoustic performance and reliability . Doors can be used within the partition system, providing maximum flexibility and choice.

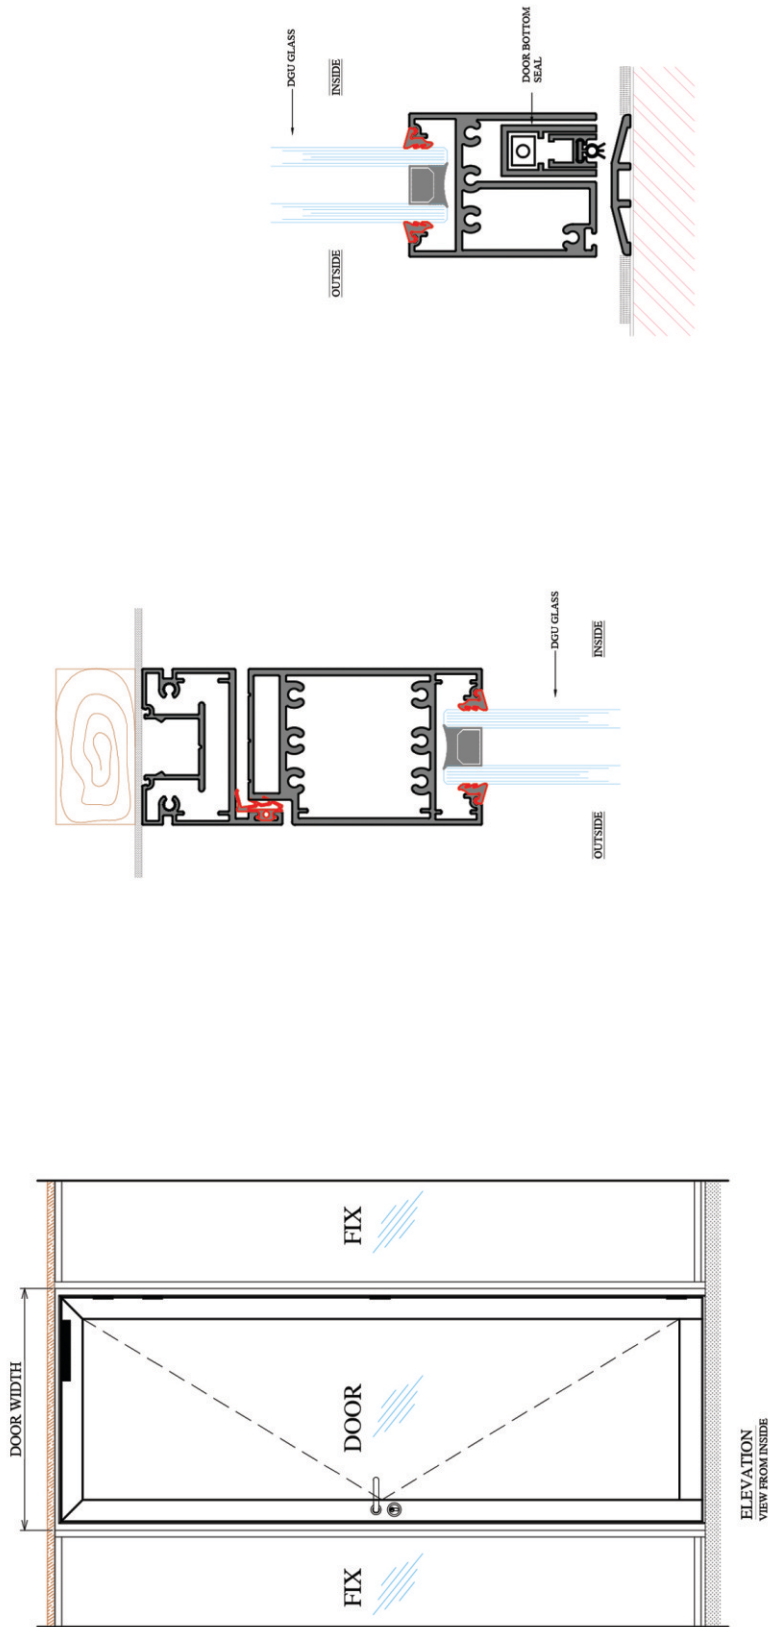

Its lightweight design with minimal extrusions and parts provide superior building tolerance and simplicity of installation, allowing contractors to achieve an exceptional standard of workmanship with minimal labour costs and time.

TECHNICAL DETAILS	
Alloy	6063 - T6 Aluminium
Finish details with microns	Anodised / Powder Coated / SS Finish
Gauge	2MM (approx.)
Standard Size	50MM X 75MM
Available Length	5500MM / 2750MM
Acoustical Insulation	Single Glass 28db - 32db DGU Glass 34db - 38db
Partition System	Single glazed
Glass Specification	Safety glass, Standard 08MM, 10MM & 12MM depending on requirement
Areas of application	Office and conference rooms Industrial and factory areas Training and research areas
Height	Standard up to 3500MM (undivided 3000MM)
Modular Width	Standard up to 1250MM
Build Connections	Connection Accessories: A concealed hook-on system for the installation of CLAN series. Industrial quality screws / fasteners in the vertical / horizontal profiles
Tolerances	Joint seals Seals are installed on floor, ceiling and support profiles.
	Connections Relocated floor, ceiling and wall connections. ±8MM in height and width
